Northern Ireland Construction Bulletin 1st July to 30th September 2010

Introduction

The Northern Ireland Construction Bulletin is produced by the Central Survey Unit of the Northern Ireland Statistics and Research Agency, on behalf of the Department of Finance and Personnel.

The Bulletin contains information on the value and volume of Construction Output in Northern Ireland. These figures are derived from the Northern Ireland Quarterly Construction Enquiry (QCE). This is a statutory survey of construction firms operating in Northern Ireland. Each quarter a sample of construction firms are asked to provide details of the value of construction activity they have undertaken in a specified period. The QCE principally produces the Index of Construction, which is an estimate of the volume of construction output. It is an important economic indicator, which contributes to the calculation of UK GDP.

Additional information on the Northern Ireland Construction Industry is also contained in the Bulletin. This information is provided by the Statistics Research Branch of the Department of Enterprise, Trade and Investment and the Health and Safety Executive Northern Ireland (from a variety of survey sources).

Key Findings

- The total volume of construction output in the third quarter of 2010 rose by 2.0% compared with the second quarter of 2010.
- The total volume of construction output in the third quarter of 2010 was 11.1% lower compared to the same quarter in 2009.
- The increase in overall Construction Output was accounted for by slight increases in both New Work (0.8%) and Repair and Maintenance (0.7%).
- The previously published decrease in the total volume of construction output from the first quarter of 2010 to the second quarter of 2010 of 5.7% has now been revised to a decrease of 6.1%.

Readers are advised:

- Results, particularly for the most recent quarters, are provisional and subject to revision, as fuller information becomes available from subsequent returns in future quarters.
- The figures reported above are based on returns from construction firms for the period 1st July to 30th September 2010;

¹ Published Quarter 2 2010

The table above highlights the latest revisions to previously published estimates of the Index of Construction for the last five quarters.

Each quarter, the estimates are revised to take account of:

- Late returns/ fuller information coming from firms
- Validation of data
- Updated deflators
- Updated seasonal adjustment
- Changes to the grossing factors

From quarter 1 2010, the Office for National Statistics (ONS) has introduced new deflators to be applied to UK construction output data. These have been applied to all tables that have been deflated to 2005 prices contained in this bulletin. This has resulted in some slight revisions to previously published figures.

² Updated Quarter 3 2010

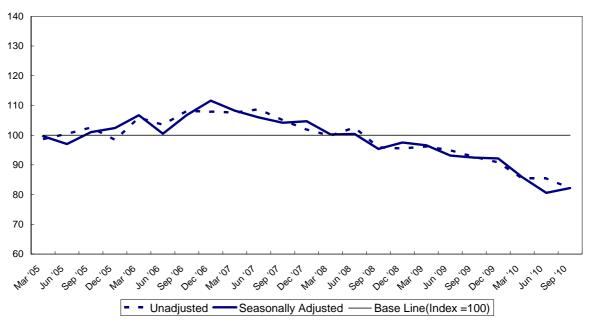

Chapter 1 Output

Figures are provisional and subject to revisions to take account of the most recent information and more upto-date seasonal factors (see Notes to Editor)

Source: NI Census of Employment, DETI, September 2007

NOTES: 1 The Census of Employment is a statutory enquiry of all employers in Northern Ireland, carried out biennially under the Statistics of Trade and Employment (NI) Order 1988.

² The Census of Employment covers employee jobs only. It excludes: agriculture (but includes animal husbandry service activities and hunting, trapping and game propagation) the self-employed, HM Armed Forces, private domestic servants, homeworkers and trainees without a contract of employment (non-employed status).

 $^{3\} Persons\ working\ 30\ hours\ or less\ per\ week\ are\ normally\ regarded\ as\ being\ in\ part\ time\ employment.$

⁴ The Census of Employment counts the number of jobs rather than the number of persons with jobs. Therefore a person holding both a full-time and a part-time job, or someone with two part-time jobs, will be counted twice.

⁵ Employees are classified to a Standard Industrial Classification (SIC03) from the business description for each employment unit.

Notes:

Estimates of the number of employee jobs are obtained from the Quarterly Employment Survey (QES). The QES covers all public sector bodies, all private sector firms with 25 or more employees and a sample of the remainder. The sample size has been chosen in order that estimates of total employee jobs should be accurate to within +/- 1% of the Census of Employment total. The survey collects information on numbers of persons in full-time and part-time employment. It should be noted that the survey counts the number of jobs rather than the number of persons with jobs. For example, a person holding both a full-time job and a part-time job, or someone with two part-time jobs, will be counted twice.

Table 2.4 Northern Ireland Labour Force Survey Self employed in Construction Industry

Year (Quarter 3)	Number			
2010	30,000			
2009	29,000			
2008	33,000			
2007	31,000			
2006	30,000			
2005	32,000			
2004	34,000			
2003	29,000			
2002	25,000			
2001	25,000			

Notes:

From 2007, the above estimates are based on re-weighted LFS estimates, which are in line with the 2008 mid-year population estimates.

Prior to 2007, the above estimates are based on weighted LFS estimates, which are in line with the $2006 \, \text{mid-year}$ population estimates.

Figures are rounded to the nearest thousand.

Above estimates are subject to sampling error.

Allocation between self employed and employees status is by self assessment.

PBR - payment by results, includes piecework, bonuses, commission and incentive payments (includes profit related pay until 1996).

Premium pay - for shift-work, and for night or week-end work where these are not treated as overtime.

x - data unavailable or suppressed

* Average hourly earnings are calculated by dividing the sum of the weekly earnings of the group of employees

by the sum of their total weekly hours.

¹ To improve coverage, supplementary data was collected for the 2004 and subsequent ASHE surveys for people who changed or started new jobs between sample selection and the survey period. The ASHE results since 2004 are therefore discontinuous with earlier results.

² For the 2006 ASHE results, ONS also introduced a small number of methodological changes. The ASHE results since 2006 are therefore discontinuous with earlier results.

³ For 2009 ASHE results, ONS moved from using the SIC 2003 Industrial Classifications to using the SIC 2007 Industrial Classifications. The ASHE results since 2009 are therfore discontinuous with earlier results.

		Labourer		Fell from a ladder	17/11/2003
		Digger driver	Self-employed	Crushed under a wall collapse during demolition	10/12/2003 (Die 21/02/2004
		Builder	Self-employed	Fell approx 7m off a roof	04/03/2004
		Joiner	Employed	Fell approx 2.4m from a wall with wet mortar	04/10/2004 (Die 07/10/2004
2004/05	4	Labourer	Employed	Crushed under a wall collapse	12/02/0
2004/03	1	Roofer	Employed	Fell approx.12.3m from a roof	15/03/2009
	1	Road Worker	Self-employed	Knocked over by a reversing lorry	22/03/200

2.8.6. (Construction	on sector – desc	ription of fata	al accidents (continued)	
Year	Number of Fatalities	Occupation	Employment Category	Description	Date
		Roofer	Employee	Fell approx. 5m through a roof light onto concrete floor	30/05/2005
		Fitter	Employee	Died in explosion at water treatment works whilst carrying out construction maintenance work	06/02/2006
2005/06	5	Farmer	Self-employed	Fell from roof (5m) through Perspex skylight on corrugated farm shed	13/10/2005 (Died 14/10/2005)
		Painter/ decorator	Employee	Fell from ladder whilst painting facia at eves of house	12/06/2005
		Road Worker	Self-employed	Electrocuted when an articulated lorry made contact with an overhead powerline	28/02/2006
		Maintenance	Employee	Fell from roof into well at Stewart Hall, Stewartstown	01/05/2006
		Construction Worker	Employee	Buried when a trench collapsed on top of him at construction site, Ballywalter Road, Millisle	08/052006
2006/07	6	Digger driver	Self-employed	A 9" wall collapsed on him during ground work on a farmyard near Limavady.	27/07/2006
		Joiner	Employee	Mobile building collapsed on top of IP when it was being moved at RAF Aldergrove.	19/09/2006
		Telescopic Handler Driver	Employee	Drowned in tank at construction of new pumping station in Portrush.	06/10/2006
		Engineer		Electrocuted when drilling rig made contact with overhead power line.	31/01/2007
		Grab Driver	Employed	Struck by lorry while standing beside his vehicle	02/05/2007
	5	Builder*	Self Employed	Fell from scaffolding at a site in Dunmurry	11/08/2007 (Died 18/08/2007)
2007/08		Builder*	Self Employed	Fell from garage roof at a house under construction in Ballynahinch	12/09/2007
		General Labourer	Employed	Died from injuries received when struck by collapsing gable wall in Fintona	25/01/2008
		General Labourer	Employed	Struck by reversing vehicle on site in Belfast	27/02/2008
2008/09	2	Plant Operator	Employed	Died when dumper he was driving went off the edge of steep earth ramp	09/05/2008
		General Labourer	Employed	Died from injuries sustained after fall from height on construction site	11/12/2008 (Died 26/12/2008)
2009/10	1	General Operative	Employed	Fell from ladder whilst assisting in repair of roof tiles. Possible seizure/fit	09/07/2009
2010/11	1	Partner	Self Employed	IP fell onto a concrete floor as he was attempting to strip the original roof in preparation for the new roof sheeting	05/06/2010 (Died 19/6/2010)

^{*} accidents not reportable under RIDDOR but investigated by HSENI

Survey Response for QCE

For the quarter 1st July to 30th September 2010, 91% of contracting firms in the sample participated in the survey. A breakdown of response by stratum is highlighted below. Construction firms are stratified according to annual turnover, ranging from the small stratum one firms with an annual turnover of less than £125,000 through to the large stratum six firms which have an annual turnover in excess of £10.5 million.

2010 Jul - Sep	Stratum	Annual Turnover (£ '000)	Response (%)	
	1	0 - 124	81	
	2	125 - 549	84	
	3	550 - 2,099	94	
	4	2,100 - 5,249	96	
	5	5,250 - 10499	90	
	6	10,500+	95	
	Overall		91	

Notes to Editors

- 1. Statistics derived from the QCE are based on returns made by Construction Firms and Public Sector Direct Labour Departments.
- 2. The sample of firms in the QCE includes only VAT registered firms in Standard Industrial Classification Division 41 43 (Construction) on the Inter Departmental Business Register (IDBR).
- 3. Construction activity measured by QCE includes general construction and demolition work, construction and repair of buildings, civil engineering, installation of fixtures and fittings and any other building completion work.
- 4. The following definitions are used in the QCE to describe Construction Activity:

New Work is any new construction activity e.g. factory and office extensions, major re-construction, major alterations, site preparation and demolition.

Repair and Maintenance is all on-site work not defined as new construction, e.g. housing conversions, extensions and improvements.

Housing refers to all housing construction activity, both private and public sector.

Infrastructure refers to any work on roads and car parks, water and sewerage, electricity, gas, communications, air transport, railways, harbours and waterways.

Other Work refers to factories, warehouses, oil, steel gas and coal, schools and colleges, offices and banks, shops, universities, entertainment, agriculture, health and welfare, garages and miscellaneous.

- 5. The base year for all the series published is 2005 (2005 = 100).
- 6. Tables 1.1, 1.2, 1.3, 1.4, 1.7, 1.8 (b) are all seasonally adjusted. Seasonal adjustment aids interpretation by removing seasonal variation. The data is seasonally adjusted using X12 ARIMA software.
- 7. Totals may not tally as each category is individually deflated and seasonally adjusted.

8. Results, particularly for the latest quarter, are provisional and subject to revision as fuller information becomes available from subsequent returns in future quarters.

The time series contained within Chapter 1-Output are updated quarterly to take account of:

- Firms not returning forms on schedule;
- Validation of data;
- Changes to Grossing Factors;
- Changes to the Seasonal Adjusters;
- Changes to Deflators;
- 9. The QCE is a sample survey, the results of which are subject to both sampling and non-sampling error.
